Review:

Lucia is afraid of bridges, but the only reason she's afraid of bridges is because her dad died driving over one. In the town of Middleton, there's a big and abandoned bridge right outside of Lucia's house. Making matters even worse, the bridge is known to have a "curse" on it and her friends are all wrapped up in it. The curse states that if a couple writes their names on the bridge, it is their way of promising to stay together. If they break up, the couple is known to have horrible things done to them. Lucia's cousin Kasey wrote her boyfriend's name on the bridge and when they break up, strange things begin to happen. Patricia is acting weird and keeps disappearing with Tony. When will the attacks stop? Will Lucia be able to figure out who's behind all the attacks? What will happen when she almost gets the wrong person arrested?

Graffiti is an amazing book by J. Fallenstein. A curse, an abandoned bridge, and a strange boy make for a perfect chilling tale. J. Fallenstein takes you through this story in the eyes of a girl named Lucia. This book is for fans of any genre. It has a little bit of every genre, such as mystery, action, fantasy, and many more. A ghost story and a mystery all in one, *Graffiti* is a good book for many different people. It is mostly targeted to 9-14 year olds but many ages can read it due to its addicting story line. It has a plot hole but you'd have to read the book to figure it out. This is the reason that I gave it a 4 out of 5 rating.
